

YADHU KRISHNA NM

BCA Student · Python Enthusiast
+91 81118 35438 | github.com/Yadhu10nm | Bengaluru, Karnataka

OBJECTIVE

Motivated 2nd-year BCA student with hands-on experience in Python, Machine Learning, and Computer Vision, seeking an internship or entry-level developer role. Self-driven with 5+ independent projects, strong problem-solving skills, and leadership experience as a college coding club leader — eager to grow within a dynamic tech team.

EDUCATION

Bachelor of Computer Applications (BCA) 2024 – Present

Surana College (Autonomous), Bengaluru

- Sem 1 SGPA: 8.69 | Sem 2 SGPA: 8.40
- Coursework: Artificial Intelligence, Machine Learning, DBMS, Data Structures, Computer Networks, Operating system, Computer architecture

12th Standard – Science Stream Passed 2024

Indira Gandhi Public School, Kannur, Kerala · Aggregate: 84%

PROJECTS

AYRA – AI Voice Assistant

Tech: Python, Tkinter, SpeechRecognition, pyttsx3, Local LLMs

Ayra, a conversational AI assistant capable of natural voice-based interactions using locally hosted Large Language Models (LLMs). Enhanced the system in **Version 3** with improved speech recognition and high-quality text-to-speech capabilities, resulting in faster and more natural conversations.

Virtual Calculator – Gesture Controlled

Tech Stack: Python, OpenCV, MediaPipe, Data Structures

Developed a touchless virtual calculator using webcam-based hand tracking with MediaPipe Hands, where finger positions are used to interact with calculator buttons rendered through OpenCV. Implemented stack-based **Infix-to-Postfix conversion** and **Postfix evaluation** algorithms to accurately process and evaluate mathematical expressions. Optimized the real-time video processing pipeline to ensure smooth performance and responsive gesture detection during live interactions.

Hand Gesture Controlled Game

Tech Stack: Python, OpenCV, MediaPipe

Developed a vision-based game control system that replaces traditional keyboard and mouse inputs with real-time hand gesture recognition and head tracking. Using MediaPipe and OpenCV, the system detects **open-palm** and **closed-palm** gestures to control vehicle actions such as acceleration and braking, while head movements are used for steering control. The project demonstrates the practical integration of computer vision, facial tracking, and human-computer interaction to create an intuitive hands-free gaming experience.

LEADERSHIP & ACTIVITIES

CodeX Club – Leader Surana College, 2024 – Present

- Grew membership to 40+ students; organised competitions, Python workshops, and coding challenges
- Mentored peers in Python fundamentals, debugging strategies, and competitive programming

Portfolio

[View Portfolio](#)

SKILLS

Languages

Python, SQL, HTML, CSS, C, Java

ML / AI

Scikit-learn, NumPy, Pandas, Matplotlib, NLTK

Vision

OpenCV, MediaPipe, Pygame

Tools

Git, GitHub, Jupyter, VS Code, PyCharm

Database

MySQL

AI Tools

Codex CLI, Gemini CLI, ChatGPT, Claude

Productivity

MS Excel (MOS Certified)

CERTIFICATIONS

- Python: Beginner to Advanced – Codebasics
- Complete ML with Python – Udemy
- DSA using Python – NPTEL
- MOS: Excel 2019 – Microsoft
- Problem Solving – HackerRank

SOFT SKILLS

- Self-motivated Learner
- Problem Solving
- Team Leadership
- Event Management

LANGUAGES

- Malayalam (Native)
- English (Fluent)
- Hindi (Conversational)
